

Description

The horn antennas HAX offer a very low SWR in their nominal frequency range and a very broad bandwidth. The gain increases with frequency up to approx. 18 dBi. The increasing gain with frequency helps to compensate cable losses.

The HAX series is suitable for both, transmission and receiving applications. The maximum allowed input power is only limited by the female N-connector. The detailed manual of the calibrated test antennas includes gain, antenna factor, SWR and directional patterns. The antenna is mounted with the 22 mm tube, equipped with a index ring for quick changes of polarization without using tools.

Technical specifications

Frequency range	500 MHz – 6 GHz
Max input power	limited only by N-connector
Connection	type N female
Gain	6 ... 18 dBi
Antenna factor	19 ... 29 dB/m
Standing wave ratio SWR typ.:	< 2
Dimensions (W x L x D) in mm:	424 x 314 x 820
Weight	4.1 kg
Fixation	∅ 22mm mounting tube
Material	aluminium
Use	Raiated immunity tests Emission measurements
